

PROFILE

Established by a group of professionals in the year **2013**, we, “**Aditya Techno-Fab Engineering**”, are the leading manufacturer and supplier of **Pre Engineered Buildings**. All our products are developed in compliance with the quality standards set by the industry. Our steel sheds are widely demanded by the clients to enhance the stability and strength of a structure with nominal thickness. The products that we offer are widely demanded for their low maintenance, anti-corrosive attributes and longer service life. Besides this, our organization also undertakes efficient **Installation Services** for the same. Our services are widely acknowledged for their features like reliability, timely execution and flexibility.

We are empowered by highly industrious experts, who are capable enough to deliver impeccable products to the customers. Our professionals are very rigid about sustaining the quality of the products and make sure that these are free from all types of flaws. The workforce of our professionals also ensures that these products are satisfactory enough to fulfil the varied applications relating to residential, industrial and commercial sectors. Due to their proficiency, we have been able to gain the faith and trust of our trusted clientele.

Under the able leadership of our Director, '**Mr. Laxminarayan Chhadodi**', we have established a strong foothold in the industry. His ample product knowledge and far-reaching industry experience have allowed us to fulfil the expectations of the customers.

We are occupied in manufacturing and supplying a wide range of **Pre Engineered Building**. The range offered by us is highly acclaimed in parking lots, restaurants, malls, cinema halls and varied other areas to guard the parked vehicles from the harsh sunlight. Our range is manufactured employing authentic raw material procured from market reputed vendors. Some of the products that we offer is tabulated below:

Categories

Products

Our products are widely lauded across the domestic market because of the mentioned below reasons:

- Longer service life
- Maintenance free life
- High tolerance against extreme weather conditions
- Cost-efficiency
- Withstand vibration and heavy shock loads

Apart from this, we carry out **Installation Services** of these products. Owing to their reliability and flexibility, these services are widely acclaimed in the market by the clients.

a new dimension in the current production process is incorporated in respect to the industry norms. Moreover, for organizing surveys, our professionals adhere to a dexterous way through a particular technology that has been executed in the form of questionnaires and evaluating previous reports.

Quality Assurance

In order to stay one step ahead of our rivals, we have formulated a stringent quality guideline. The guideline allows us to sustain our products in line with the global standards of quality. Our experienced quality inspectors make sure that the products provided by us are free from all flaws by testing the base material for the manufacturing of our products at our premises. Some of the factors based on which the testing process is conducted include:

- Functional life
- Maintenance Tolerance

In addition to this, these quality controllers ensure that the manufacturing process is executed in an efficient manner. Further, our organization adheres to certain quality guidelines that include:

- Delivery of flawless products
- Continual quality improvement
- Cost effective products
- Prompt delivery of products

Our Infrastructure

We have set up sophisticated infrastructure, which sprawls over an out sized area in Madhya Pradesh, India. The unit is partitioned into well-defined facilities that are located in close distance to each other in order to ensure easy and efficient supervision. Listed below are the varied sections of our infrastructure:

- Manufacturing unit
- Research unit
- Quality control unit

The manufacturing unit is installed with all the latest and advanced machines that allow us to meet the bulk requirements of the clients within the promised time frame. In addition, we constantly lubricate our amenities and technologies to confront the challenges of the future.

Our Team

The dexterous professionals recruited by us are backed with a elephantine industry experience and allow us to provide impeccable products to the customers. Our workforce carries out all the tasks in a harmonization manner to ascertain that the orders placed by the customers are completed within the short period of time. Some of the members working in our workforce include:

Engineers, Quality controllers warehousing staff
Sales and marketing executives

Our professionals are optimistic about manufacturing the products in line with the details given by the customers and offer them with utmost satisfaction.
